

Reframing ADHD: Discovering New Perspectives

ADHD WA Seminar

October is ADHD Awareness Month
That's a whole month devoted to sharing
reliable information about ADHD based on
science and peer-reviewed research.

ADHD awareness is not just for the month
October, of course. As people living with ADHD,
or working with those with ADHD, we have the
opportunity to be leaders in our local and online
communities as we shine a light on ADHD,
providing trustworthy resources all year long!
